

## COINPENNANT

The goal of CoinPennant is to establish a social platform where beginners and experienced traders can collaborate, make market analyses, share tips and make profits. All of this is backed by **TRANSPARENT SMART CONTRACTS**, ensuring financial protection for each individual.

CoinPennant is an intelligence trading platform and social network that enables copy trading, advanced technical analysis and data mining, creating the must-have tool for both beginners and expert investors

### the PROBLEM

Right now, cryptocurrency traders are struggling with a problem typical of emerging economies: the difficulty of obtaining timely, reliable, and useful market information. The prices of cryptocurrencies rise and fall daily. How can any investor, even a savvy one, make the right trading move at precisely the right time? And if an investor is lucky enough to stumble upon "good information," what then? There are few end-to-end resources for investors of all trading levels. That dearth serves as a major barrier to trading for many new crypto converts.

### the COINPENNANT SOLUTION

The CoinPennant platform comprises two equally important services: a crypto market analysis dashboard and an Investor Social Network where beginners and master traders share knowledge, trading hunches and analysis, and transparent feedback on executed trade tips. Through our subscription service, master traders provide beginners with market analysis and the opportunity to purchase trading tips.

#### Investor Social Network

The Investor Networking Platform connects beginner and professional traders to identify investment opportunities and uses CPNT tokens as payment for successful trading tips

#### Data Analysis Module

The CoinPennant team will perform algorithm based technical analysis of multiple cryptocurrencies and push market indicator notifications to the user's market dashboard.

#### Copy Trading Module

Users can subscribe to master trader's auto-copy package where user's funds are managed in exactly the same way as the funds of master traders.

### the CPNT Token

Payment for all subscriptions, services, and product delivery will be supported by our new cryptocurrency the CoinPennant Token (CPNT). The CPNT is an ERC20 token and a smart contract system built on the Ethereum blockchain. The CPNT smart contract will enforce two use cases:

- If the trading tip is successful, the transaction will be completed and the master trader will receive their hat tip fee in CPNTs.
- If the trading tip is unsuccessful, the transaction will be canceled and the trader will receive his CPNTs back. The master trader will not receive CPNTs.

#### TOKEN SALE TERMS

start: TBA  
 hard cap: \$10,000,000  
 exchange rate: 1 CPNT = \$0.5  
 contribution method: ETH  
 ERC-20 Token

The exact number of tokens generated depends on the amount of funds contributed. No token creation, minting or mining will occur after the end of the crowdsale period. Tokens will be distributed at the same time after the crowdsale.

#### TOKEN ALLOCATION

45% Crowdsale Contributors  
 26% Team  
 12% Bounty  
 10% Advisors  
 7% Platform incentives

#### FUNDS ALLOCATION

75% Operations and development  
 15% Marketing  
 10% Future partnerships

### FOUNDERS
